Party Planners:

You are planning a party for 5 people and they will be sitting at one table.

1. You need to buy 2 cupcakes for each person. Cupcakes come in boxes. Each box has 4 cupcakes. How many boxes will you need to buy? Will you have any left over?

2. You need to buy balloons. Each person will get 3 balloons. The balloons come in groups of 2. How many balloons will you need to buy? Will you have any left over?

3. You have 4 red plates and 4 blue plates. How would you set the table? What will you have left over? Can you set the table a different way?
